Moderator Mod **Joined:** Thu Dec 09, 2004 8:48 am	OOG is a complete out of game controller. it handles everything out of game. this is open source and should only be down loaded from my svn. Features: -auto restarts d2 and injects d2bs -game lists thats stored out of game. restarts dont affect game# or timing -realm down delay -keyswaping (with d2launcher) -multibot -can run multiple profiles with d2launcher Setup microsoft 3.5 framework

run OOG.exe
edit profile, double click d2path box and find where you installed d2. set the d2bs path to where d2bs.exe is. fill in account and game information. hit save. hit start on the main screen

Multiple profiles can be run with multiple d2launcher's set up accoriding to this guide
http://www.edgeofnowhere.cc/viewtopic.php?t=419412
Get the d2launchers running in the same game before configuring OOG
Each running profile should have a different d2launcher folder. d2launcher is not instaban as of this post date.

Profile Settings
Games Per Hour: this sets how fast OOG makes games. no min/max/threashold. with one cdkey i run at 19
Enter Chat Msg: could be used for .login. it only gets exec on entering chat.
Pre Game Msg:chats before attempting to create a game. note the $G and $P for game and pass
Max Game Time: d2bs can deadlock in game. this will kill the d2 window if the game runs more seconds than this setting. should be blank or 600+
using Login(): the OOG name corrasponds with a setting in d2bs.ini bob in oog ->[bob] in d2bs.ini

OOG settings
cdkeys:cdkey1.mpq;cdkey2.mpq;cdkey3.mpq
Realm Down Delay: will kill all profiles and wait then start back up
Debug view: shows everything that comes from d2 via sendcopy data, profile/cdkey info, printing game list will print game times.
exe to run on realm down: path and exe to run before the realm down delay.

Commands from script:
oog commands sent from script:
example: sendCopyData(null, "OOG", 0,"ShowWindow 6"); // used in starter to minimze d2

"ShowWindow 6" will minimize the profile other # supported:
#define SW_HIDE 0
#define SW_NORMAL 1
#define SW_SHOWMINIMIZED 2
#define SW_MAXIMIZE 3
#define SW_SHOWNOACTIVATE 4
#define SW_SHOW 5
#define SW_MINIMIZE 6
#define SW_SHOWMINNOACTIVE 7
#define SW_SHOWNA 8
#define SW_RESTORE 9
#define SW_SHOWDEFAULT 10

#define SW_FORCEMINIMIZE 11

"Kill Me" = killing current profile, will not restart
"Kill Profile" will kill the profile named Profile
"Kill All" will kill every running profile
"Start Profile" will start the profile named Profile
"Start Me" = un-pausing current profile (out of game only)
"Stop Me" = pausing current profile (out of game only)
"Kick Profile" will attempt to exit the game for the profile named Profile

ntbot improvments: from ad2bs package
pause key pauses
auto create config file
my leaching scripts -needs leader config
NT_PickUtility tries to fill belt and tombs with pickit
FastSnag = pally only, after each attack it checks recent drops to snag based off itemdrop event
added itemlogging back in
made bosses work with diffrent languages

ive included yamb. in d2bs.ini change ScriptPath=scripts-yamb
download torent here
rightclick on script-yamb folder and update

New Stuff
added scheduling. you can set profiles to start and stop at any time

New in 1.3 release
added d2 muli support to replace d2 launcher. use cache Fix or assign diffrent d2 folders / profile. no more need to mess with d2 mulit's ini.

works kinda like paint click the color and drag your mouse
also added inventory viewing can be viewed any time after being logged into ntbot with updated scripts

also added inventory peeking press F11 in in game with ntbot and view other players inventory too

OOG + d2bs 1.4 Package
OOG Source

New in 1.3 release
added d2 muli support to replace d2 launcher. use cache Fix or assign diffrent d2 folders / profile. no more need to mess with d2 mulit's ini.

New in 1.4
made game joining / creating / saying to use core commands instead of sending clicks
auto oog updater has been added
imporved inventory viewing added and itemlog to show inventory

All of assembla seems to be down.

[EDIT] It appears to be back up now.

For me, the bot is stuck at the WP while running Pit. I imagine the NTbot scripts were not written for D2BS 1.1... time for new scripts!

Once again, nice work team D2BS!

It shouldn't, seeing as I'm running windows 7 and developing d2bs on it.
