Moderator   Joined: Fri Dec 08, 2006 10:52 am Location: /dev/null	<p>The main functionality of RedVex works perfectly in 1.12 as well as a vast majority of plugins. Only those that relied on reading Diablo II memory (for pathing and the like) will need to be updated. A list of such plugins has been created on the Redvex forums.</p> <p>Redvex 3.2 download here</p> <h3>Plugins</h3> <p>Mindigo (pickit) by Zoxc Download it here.</p> <p>Magnet (pickit) by Paper Download it here.</p>

Condom (A chicken/auto potion plugin) by Turlok

Code: Select all

Features:

- * Fast auto-tp-to-town when situation is getting hot
- * Automatically drink potions for you and your merc from belt
- * Automatically drink potions for you from inventory
- * Automatically exit game when life is too low
- * Auto-Aim and TPPK features
- * In-Game notifications on BO, Oaksage, Enchant, Iron Maiden and when they wear off
- * Shows player's account name when they type (if available)
- * Shows player names in color codes based on alliance status
- * Shows in-game players when you join
- * Shows overhead messages players visible on the automap (distance w/o party)
- * Logs PK character names and account names and displays a [PK] tag for these people

Download it [here](#).

Slut (followbot) by Turlok

Code: Select all

A follow bot for Redvex by Turlok! It is always advisable to use a condom when involved with a slut! Download Condom.dll just to be safe!

This plugin allows you to use a character like a mercenary, following you and protecting you from a minimized screen!

Download it [here](#).

Keychain (multikey) by FooSoft

Code: Select all

The Keychain plugin allows the user to easily log into Battle.net using multiple sets of CD keys.

Download it [here](#).

OSTPPK (simple tppk program) by AntiRush - updated by RoQ

Code: Select all

As the first release this is pretty simple - hotkeys for autoaiming with left and right click as well as a fastTp/hostile hotkey

Controls: (Default is listed - if you wish to use different hotkeys set your speech hotkeys differently in Diablo II)

- Scroll through the Target List: Numpad 1 (Speech 'Follow Me')
- Auto Aim left skill: Numpad 4 (Speech 'Sorry')
- Auto Aim right skill: Numpad 5 (Speech 'Bye')
- FastTp/Hostile: Numpad 2 (Speech 'This is for you')

Download it [here](#).

Chanter (enchant bot) by Turlok

Code: Select all

An enchant bot plugin for RedVex by Turlok!

This plugin is a stand-alone chant bot. It features autoparty and enchanting commands. NOTE: If a player goes hostile with the chanter's party while in enchanter mode, she will tell them off and squelch them - preventing them from using any commands until they rejoin.

Download it [here](#).

both of these seem to work, though I didn't let Claw run for very long, so I don't know if it was actually checking anything, but it was going through portal and talking to anya all right.

Why is it that Redvex cannot load Condom.dll on Windows XP, but is able to load it on Vista? When I manually go to Manage plugins and click Enabe, it says "condom.dll has invalid SDK version". I loaded it on my Vista and it's able to load it without a problem. Any suggestions?

P.S. I also tried loading the Pickit on the computer with XP and it was able to detect it.
