King-James	**Post subject:** How would I write this? **Posted:** Fri Jan 16, 2015 8:17 pm
User Gold ●●● **User** **Joined:** Sat Feb 14, 2004 10:02 pm **Location:** Maine	Right now, my bot crafts caster rings and ammys only because that was in the default pickit or char config file. I want it to craft blood gloves and belt as well but I don't know where to find the item ID or the line of code I would reference. I tried just changing the **Code:** Select all ```Config.Recipes.push([Recipe.HitPower.Gloves, 452]); // Craft Hit Power Vambraces```

to "Recipe.Blood.Gloves" but of course I don't know the item ID there. Checked the sticky about references and couldn't find it...

Can anyone help me out?

P.S I run 4 bots, same game... Chaos n Baal and some other shit inbetween... So if you have anyone awesome scripts for multibotting or anything that you think I might want to check out, please share.

Also, is it possible to have D2bs skip Nihilithak if he is lite immune, but only him?

Add immune in character config file, as for cube recipe use njip for item ID it is in your bot folder.

Thank you for the njip solution, was what I was looking for.

However, in my char config file - I can have it skip lightning immune mobs, but that's not what I want.

I have a Barb, Hammerdin, Lite sorc, and Wind druid that bot in the same game together. I have them BO at the very start, Sorc hits Nihlathak and Pally hits Trav real quick while Druid takes Pindle... Then they go to chaos, full clear - Head to Baal, full clear.

The sorc is the "leader" of the group, so she sets the Diablo TP and Baal tp's... So at the beginning of the game, when she goes to Nihlathak, if he is lite immune, then it takes ages for merc to kill him with everything around. It uses telestomp as well.

When I put it to skip lite immunes, it will skip chaos bosses or tp in baal runs to avoid the shit that my merc's infinity doesn't remove... And it messes up my runs, sometimes resulting in r/d's.

I am asking if there is a way to only have it skip him if he is lite immune, and still continue with the rest. Like add his monsterid or something somewhere?

maby you can put some codes in your nihlathak script so if hes light imu
you sorc skips him that way instead of putting skip light mobs in your char config

BHDev

Well that's a tough one. I suggest you turn off Config.Telestomp on the sorc. Immunes will be skipped automatically and if Vizier is totally immune you can rely on other chars to kill him.

I'll give that a shot.

I am looking to also re-write my pickit Kolton... Is there a way to have it keep items by Affix's?

What I am looking to do it have a 100 line pickit tops. Ideally it would go something like...

Code: Select all
```
[Itemtype] == Gloves && Quality = rare # FHR == 24 && [strength] >=25 && [maxlife] >=30
```

That way it would pick up every glove, normal or elite?

And what about helms and shields? Since we have class specifics of each, are there specific ways to write this in the most vague sense so it picks up all associated items?

User

[Itemtype] == Gloves && Quality = rare # FHR == 24 && [strength] >=25 && [maxlife] >=30

that will pick rares only

and there should be a item class id for anyshield if i remember right
