D2BS can be used to make Diablo 2 do almost anything that can be done in the game by a human player. D2BS does not try to exploit any bugs in the Diablo 2 code, the Battle.net protocol or game servers; it only simulates a real player. **Binary Download:** here **Source Code:** here **Visual Studio 2008 Runtime** (necessary for loading the D2BS runtime): here

.NET 3.5 Runtime (necessary for loading the D2BS loader): here

```
Version History:

Version 1.3 -

    .    Updated to 1.13c

    .    Various leaks and bugs fixed, nothing major

    .    "chatmsg" and "whispermsg" now listen to channel events as well as in-game events.

    .    Lots of little stability fixes and whatnot.
```

	Erhm, I forgot to remove the Warden crash code. Just a moment while I rebuild the release.

Same here

But i created many scripts in D2BS so i think i can do it alone 😃

Great Job!

this is offical core release.

my oog with d2bs 1.3 has been updated its pretty strait forward to use i think

OOG with 1.13 thread

Sweet, for the first time i'm gonna use d2bs instead of nt 😃

anyhow is this just as detectably as nt atm since warden is on? or is the anti detection updated?

im lost when it comes to d2bs 😃

oh another question, can i still use old scripts with this ver?

The anti-detection is updated. We're still not quite certain exactly how effective it is, but we've been running it with known ban hacks and so far nothing.

Depends on how old, but most likely yes. However, there's new versions of almost everything so you're going to want to update anyway.
