Now I believe if you use either one of these scripts by YGM or Cognac you have to replace all, unless specified by the thread starter.

You ought to rename my script to generally specify Bow/Crossbow restocking. I only referred to it as an Amazon script because the need only arose when I was creating a glass cannon. Following my example, it will work for any character using a bow. Feel free to remove this message once it's noted to avoid any clutter. 😃
