Retired Staff 🔵🔵⚪ Mod **Joined:** Tue Jul 30, 2002 6:41 am **Location:** 127.0.0.1	This collection of information/links will, eventually, cover all the bots/programs offered in this forum. I will update this post as time/interest dictates. If there is information presented here that you know to be inaccurate and you can provide links/proof of/to correct information please feel free to contact on of the forum moderators. Thank you and enjoy! Q: Why the hell are the file sizes so large for some of these files? A: For a variety of reasons, all of our files are hosted on RapidShare. RS is stupid sometimes. One of RS's rules is that in order for a file to earn points, it must be over 5MB. So, we pad the files. == Modded D2NT v1.7.2 + NTBot v3.6M2 by CyberVirus [ENGLISH] Modified by: CyberVirus

Language conversion by: Neon401

NTBot Script for D2NT.

Image

==
Kukbot PickIt Generator
Created by: Purell

This program will simply make a unique.ini for kukbot's pickit based upon the items you select. It will pickup the items you select whether they're etheral or not.

Image

==
hypnodok's Clonehunter Beta 1
Created by: hypnodok

Notifies you when you enter a game with a hot IP.

Image

==
AGB.MapHack
Created by: ApacheChief

Doesn't require a login any more (free). Map generation stuff is included (AGB.Mapping.dll).

Image

==
HCTPPK v1.12 Crack
Created by: Sheppard

- Null'd Trojan Downloader
- Removed Everything that would access hcpk.net or other sites

==
D2Launcher (a D2Loader replacement)
Created by: Sheppard

This is a simple Diablo II Launcher. It allowes you to start more than one Diablo and extends the Commandline Parameters a little bit.

==
Cracked Kukbot 1.12 (Chaos/Baal)
Created by: ya

It's a bot by kuk. Make sure the Kuk-Crack.dll is inside the plugin folder, it patches his nasty pseudo authorization. I didn't noticed any pw stealer inside, so i guess he removed it.

==
NoHide
Created by: Shonnie

Works like d2loaders -nohide flag, except it's for use without d2 loader !

==
RS v1.48
Created by: hells_fire445

RS (AKA Rule Spam) is a little program to help you spam your rules or help you advertise IN Diablo GAMES without typing it out each time.

Instead, you pre-type it once into the program settings, and you press a "Hotkey" and it will type the whole message for you automatically!

Image

==
IHTPPK 5.0
Released by: Strifesterz0r

New features:
   - Target Camp: Select a target on the target list and your camp will only hostile if that specific target comes down the tp or waypoint.
   - Improved Stash Mod: You may now open AND close the stash and swap items from your stash using this function.
   - BPMod: This is simply Sheppard's BP mod integrated into IHPK. You may use this or use tmcBP mod, whichever you prefer.
   - Auto Potioning: Set the value in front of the selected line to have IHPK automatically drink potions when your life or mana reaches that %.
   - Anti PK Functions: You may now set your Anti PK to warn you if someone has aimed/hostiled you, rather than just towning. You can also set it to teleport out of the way.
   - Improved Fast TP: The fast TP has been buffed up, with the removal of the TP delay. Try it out!
   - Left Click AA: You may now auto aim with the left mouse button!
   - Show Quest Flags: A sneaky little add on here ;). When someone is mfing in your game, IHPK will tell you if they have killed a boss, so you know where to camp them for the next game.
   - Enchant Bot: Ya really. IHPK finally has a working Enchant Bot!!!
   - Aim Box: You now have the option to disable this.
   - Missiles on Map: Monster and player missiles are now displayed on your map.

Image

==
D2Parser Item Logging/Viewing/Searching
Created by: Buey

It logs all Items (with Name, Stats, Attributes, BaseItem etc) to nice little XML Files when you leave the game.

Image

==
RapidLightning - No Cast Delay!

Created by: <u>Ultratech</u>

How it works: most skills use SC for "cast", but skills that pause in the animation like inferno and chain lightning use SQ for "sequence". This changes the SQ to SC so it's casted like a normal skill.

===
<u>KillerJohn's TurboT v8.5</u>
Created by: <u>real_killerjohn</u>

It's a multi-bot.

===
<u>Double Teleport Fix</u>
Created by: <u>Ultratech</u>

Do you get double teleport with high cast rate? This is a quick mod to fix that. It adds a very small cooldown to the teleport skill so that you can't cast it so fast that you double teleport to the same spot.

===
<u>Shopbot</u>
Created by: <u>DeZimTox</u>

This shopbot has the particularity to make use of the plugin leader, so no more of that walking all across town to renew the Npc's inventory, and you can also shop at any npc in the game.

===
<u>Awesom-O 4.0.0.7 Donor Beta</u>
Created by: <u>kingsob</u>

Multi-bot with a huge list of mobs it can kill.

Image

===
Game On 1.0
Created by: archn

Allows you to play Hangman in Diablo II's chat window.

Image

===
Random Caps v1.0
Created by: archn

Each time you join a game, it adds random caps to your characters name.

Image

===
D2NT 1.7.2 and NTBot 3.6
Created by: Kimsout

This is a Bot system for Diablo II 1.12, similar to D2JSP.

Image

===
Awesom-O 3.8
Created by: kingsob

Multi-bot with a huge list of mobs it can kill.

==

Uber Portal Fix (1.12)
Created by: R1CH

Unstacks your uber portals.

==

Mule Management System with FireFly's IML
Created by: Affe83

This program is the exact same program as was KG Mule Search. However, as KG invdump.exe no longer works, FireFly has been kind enough for us to create a new dumper.

==

D2GamePortal 1.0.0
Created by: UnIXbLueStar

What can it do ?
    -Read incoming, outgoing packets.
    -Block outgoing packets.
    -Send packets or fake a received packet.
    -Plugin support. (Easy to make : pickit, bots, any hacks out of it)

==

KeyChecker
Created by: Zoxc

Checks multiple CD keys to see if the keys are valid.

Image

===

BattleNet 2 Singleplayer
Created by: Sheppard

This program generates a save file of your character and writes it to your save folder. Your hotkeys on the save file might fuck up, also the waypoints and quests are missing. Join a game with your battle.net character, select your game window in the loader and press install. If everything went fine you should see a message in the game.

Image

===

NPCMove v0.1
Created by: Mikon.

Steal NPC's from town!

Image

===
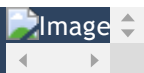

iLeechU v0.1 Beta
Created by: Fattys

This is a LeechBot. It'll follow a bot on your friends list, specified in the ini file thats in ManagedPlugins folder. Currently it is limited to only following bots on your friends list, but this will change in coming versions.

Image

===

Claw ShopBot 1.3
Created by: TK_Inc0rperate

Claw is an act5 shop bot that works mainly with Anya, you MUST have the red portal still open to use it.

Image

==

FastExit v0.1
Created by: .rzr

Based on a "request" of someone around here, I made a little utility based on AutoIt which allows you to exit a game/kill Diablo II with a simple hotkey. t's

rather simple, but still effective in my opinion. You could use it as an alternative to chicken hacks, for example.. but it's also quite useful for normal
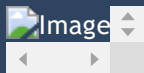

playing.

Image

==

AutoParty v0.1.2
Created by: Mikon.

    - invites all players to party
    - joins party if available, otherwise it will accept the first invitation you get

Image

==

szIPRelay 1.0
Created by: Soulzek

This will print the game serve IP to DII's window or place it in the DII window titlebar.

Image

==

Pseudoreso (1.12)
Created by: ya

This program allows you to play DII at much higher resolutions then originaly intended.

===

D2Loader Frontend
Created by: Actium

This is a very simple front-end for D2Loader / Diablo II that will allow you to run D2Loader with many of the common command line options without having to make separate shortcuts.

===

gMap v0.1 Beta 2 Map-Hack
Created by: Mc God

Reveals current map only.
The loader will find all your Diablo II windows and let you choose which one to inject. In case it only finds one, it will auto-inject.
Works on XP/Vista, D2Loader/Game.exe

===

Version Hack - Play with 1.11b on Closed Realms
Created by: Sheppard

Allows you to play DII version 1.12 as if it were DII version 1.1b on Battle.net. This will allow you to use all old version 1.1b hacks.

===

lolwut maphack 0.4c
Created by: emjay

This is basically a ripoff of stings hackmap lite. It uses the same technique as his lite version. since i didnt know what is needed for making a working mh, i tried to reverse stings version and even looked at his/mousepads source (i also looked at mc gods code so credits go also to him). But don't get it wrong, it still injects code (for a short period of time, as long as d2 freezes)! So use it at your own risk. It's a simple reveal act maphack so i will never add more functions.

===
iChicken v0.4.1
Created by: Mikon.

This is a simple chicken program, ment to be used with D2Loader v.1.12.

===
mMap v0.3.2
Created by: Mc God

Open source, GPL'd maphack.

===
AutoTeleport 1.6b(1.12)*New*
Created by: ya

Automagically teleports you from one point to another with the press of a single key.

===

MMHack(Monster/Missile) 1.1 for 1.12
Created by: ya

This hack simply lets you see the monsters and missiles on minimap.

==
D2Helper v1.31
Created by: Rodik

D2Helper does not infringe on the D2 process and only reads memory to provide information about your D2-windows. It's main function was to help people that

hunted for anni's in coop's/pwe's to keep track of their windows, although alot of people have found other good uses for it as well.

==
CD Key Viewer (1.12)
Created by: R1CH

Allows you to view all currently installed CD keys. Usage note: to find your cdkey used when you installed, look at the d2char.mpq (Exp) and D2sfx.mpq

(Classic) files.
